SOURCE:

1. The ammunition supply depot near Feldebrő 4748N-2012E was constructed in recent years to supply units located around Eger 4754N-2022E, Hungary, with small caliber ammunition. The buildings were built close to each other -- usually two to three meters apart -- and were in good condition.

but 30 soldiers operated the depot.

2. We passed through the area of this depot on the road see Annex A, Point #17 to the maneuver area seven kilometers to the northwest. The area was not camouflaged, but it was hidden from view on the ground by the dense growth of trees in the forests around it. From the air the buildings would be visible.

3. I believe ammunition was brought to this depot from the ammunition and small arms factory near Verpelét 4753N-2014E

Annex A. Memory sketch of the ammunition supply depot near Feldebrő, Hungary

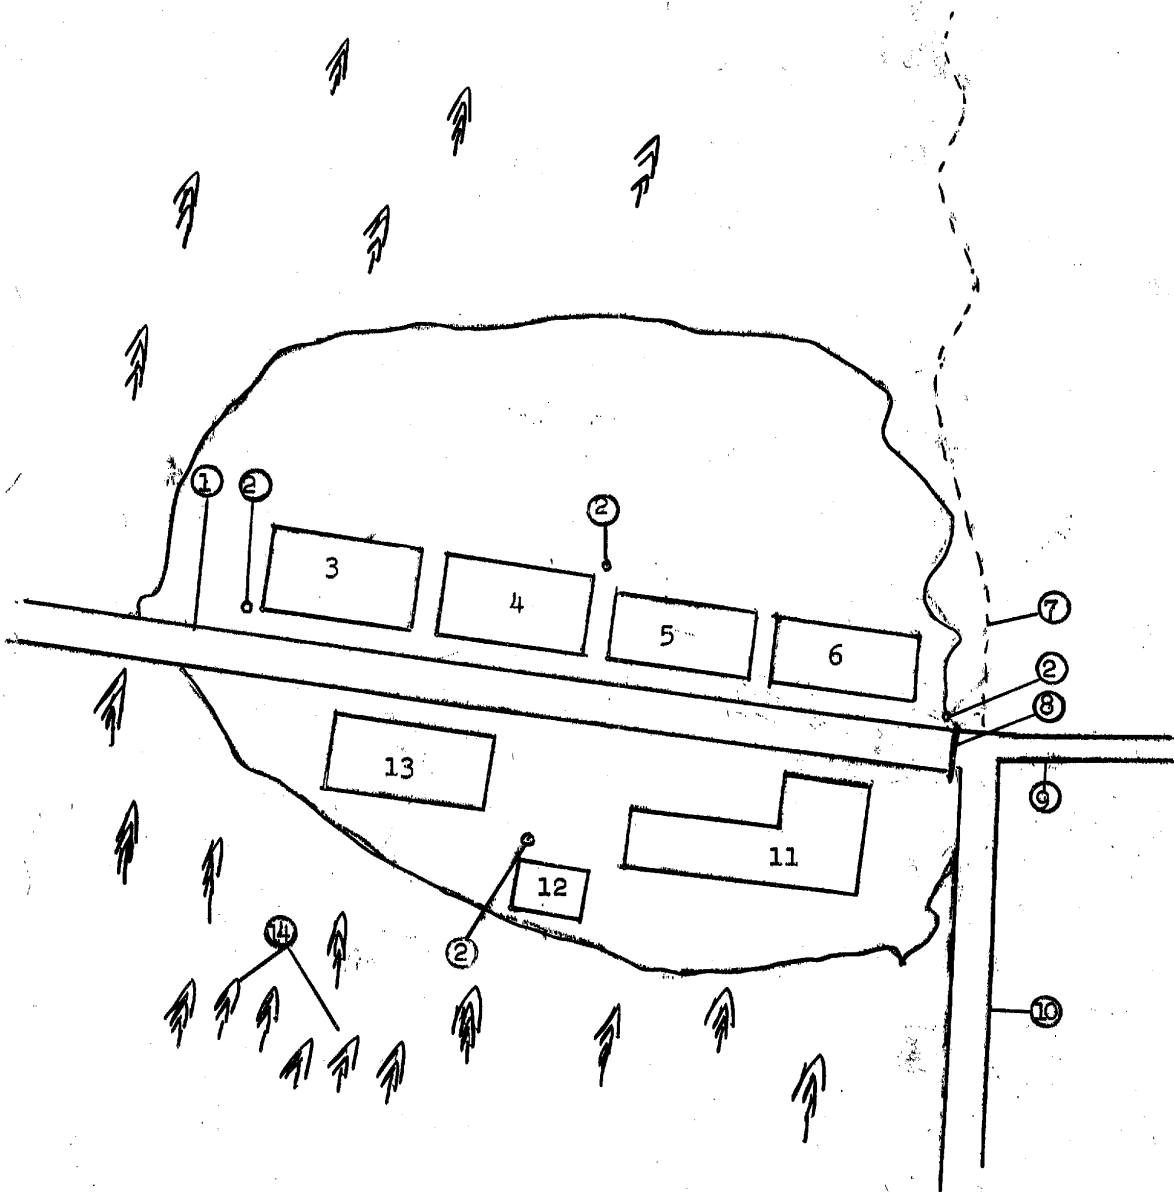

SECRET

Legend

1. Road, secondary, crushed stone, drainage ditches, five to six meters wide, both sides, one meter deep. Road led to small open area, then to another forest where field exercises are sometimes conducted.
- 25X1A. [redacted]
2. Guards, four during day, and I think the number increased to six at night. The guards carried submachine guns, PPSH M1941, or automatic rifles. Guards changed every two hours. Posts consisted of walking around the immediate building area.
3. Building, two stories, brick construction, 18 m. long, 10 m. wide, 20 m. high, four to five rooms each floor. Stored pistol, rifle, submachine gun ammunition. Also medium mortar shells, 82 mm. in light metal containers packed in sawdust, three in each container.
4. Building, identical to point 1, this report.
5. Building, single story, concrete construction, 18 m. long, 7 m. wide, 15 m. high, heavily reinforced with wire mesh and metal rods, flat roof six inches thick, reinforced with wire mesh and rods, two windows in front, door in middle, building divided in two equal portions. Stored heavier type mortar and artillery shells, 82 mm. mortar shells and 45 mm., 57 mm. AT shells.
6. Building, identical to Point #3, this report.
7. Foot path, used by civilians going to and from Feldebroe and Vecs.
8. Gate, traffic pole type barrier, with guard posted. No pass system, only military personnel allowed.
9. Road, third class, four meters wide, crushed stone and clay. Road leads to bivouac area used by Sixth Motorized Infantry Regiment from Eger. Used only from early May to late September. No permanent buildings. Field exercises conducted in surrounding area. Regiment drew ammunition supply from this supply depot while on maneuvers.
10. Road, secondary, crushed stone, drainage ditches on both sides one meter deep, five to six meters wide. Road leads past an unidentified building [redacted] and to Feldebroe.
- 25X1A. 11. Building, one story, concrete construction, 30 m. long, 14 m. wide, 8 m. high, divided into three rooms, reinforced with wire mesh and metal rods; flat roof, concrete, reinforced with wire mesh and rods, six inches thick; two windows, 1.5 m. x 2.5 m., glass-paned. I saw boxes of various sizes containing ammunition brought in and carried out but could not identify type.
12. Building, single story, brick construction, 8 m. long, 7 m. wide, 10 m. high, gabled tile roof; two windows above ground level, two windows on ground level; basement under entire building. Building used as barracks for troops stationed there, also as Mess Hall. Barracks held 30 men.
13. Building, single story, concrete construction, 20 m. long, 10 m. wide, 8 m. high, flat roof six inches thick; entire building reinforced with wire mesh and metal rods; two windows in front, door in middle. Stored pistol, rifle, submachine gun ammunition; also mortar and artillery shells, light caliber.
14. Forest, beech trees, cleared yearly of underbrush, lies in valley.
